

MAUREEN FRANK

PROFILE

With over 15 years of web-related programming experience, I bring a variety of formidable skills, integrity, and a strong work ethic wherever I work.

EDUCATION

Bachelor of Science - Computer Science, California State University, Dominguez Hills, CA

LANGUAGES

HTML, PHP, Javascript, MySQL, CSS, Perl

VIEWABLE WEB PROJECTS

Projects I developed which can be viewed online. Other projects can be provided if needed.

www.TheMandalaLady.com

- site menu system PHP driven
- “The Art” section and the “View Mandala Designs” of “Mandalas to Color” section both use PHP, MySQL, and Javascript to dynamically display art/text per category, with hover and pop-up features.
- The ‘pop ups’ for each art/design piece are generated dynamically using PHP and MySQL
- For “view contents” on the “Coloring Books” page under the “Mandalas to Color”, I use PHP/MySQL and Javascript to dynamically create the ‘pop up’ and slideshow
- used CSS throughout the site

www.SpiritualCompany.com

- used PHP to dynamically display most recent articles on home page, as well as generating the “articles” and “forecasts” pages
- used CSS throughout the site

www.MoonfireGlass.com *

- used PHP and Javascript to create the ‘gallery’ pages.
- used CSS throughout the site

www.RainbowCommunications.com

- used PHP to generate the “Forms w/Examples” page where it verifies a sample page is available for viewing
- used CSS throughout the site

PREVIOUS WEB PROJECTS

Projects that for various reasons are no longer available for viewing online. References can be provided to validate my experience on these projects. Other sites/project can be provided if needed.

Online Conference Registrations

- In collaboration with the manager of the system, I used PHP/MySQL to process the online conference registration for a variety of conferences from beginning registration page all the way through payment; allowing for multiple registrations in one order and including a shopping cart.

Online Class Registration

- In collaboration with the manager of the system, I used PHP/MySQL to develop an online course registration system which included dynamically generated course lists, registration, a shopping cart, an admin section allowing for a variety of tasks including the addition of courses, teachers and locations, and generating student lists.

Online Questionnaire

- Developed a 3-part, multi-page online questionnaire, generated and maintained dynamically using PHP and MySQL. It required participants to register and allowed for them to log in and out as needed and tracked how far along they progressed through the questionnaire.

EXPERIENCE

WEB SITE DESIGNER CORVALLIS, OR 2000 - PRESENT

Web Angel Designs

Owner/Web Design consultant providing all aspects of web site services, including design, re-design, web graphics, software development, and training.

INSTRUCTOR CORVALLIS, OR 2001-2003

Linn-Benton Community College

Provide instruction in web-related courses, including "Web Graphics", "Web Pages - Intermediate", "JavaScript", and "Web Pages for Seniors". Responsible for developing all lesson plans and lab projects.

WEB "GODDESS" ANALYST STUART, FL 1995 - 2000

Martin County Board of County Commissioners (BCC)

Solely responsible for the creation, development and maintenance of the entire BCC web site (www.Martin.fl.us**). In 1999 won the 3CMA "Award of Excellence" for the "Best Technology Services - Worldwide Web" category for populations 100,000 - 350,000. Interacted with all departments to set up and maintain their pages. Developed automated software to maintain the site.

* Site currently down due to client forgetting to renew the domain name

** While the site looks different then when I worked on it, much of the organization of the site, especially the departmental pages, still remain in place.
